

LUV RAINA

Full Stack Engineer & Web/Mobile Developer

luvraina7@gmail.com | Japanese Proficiency: Professional Working (6.5+ Yrs in JP Workplace) | Tokyo, Japan

PROFESSIONAL SUMMARY

Full Stack Engineer with 6.5+ years of experience delivering web and mobile applications in Japanese corporate teams at IBJ Inc. Expertise spans Ruby on Rails, Next.js, React Native, Swift, Laravel, and AWS, with measurable results including scaling a 30,000+ DAU platform, improving PageSpeed Insights performance from 29 to 91, and reducing review cycles from seven days to one. Established AI-assisted engineering workflows using Model Context Protocol (MCP), prompt and context engineering, and Cursor Skills & Rules to automate UI audits, strengthen build stability, and accelerate delivery.

TECHNICAL SKILLS

Languages & Scripting: JavaScript, Ruby, Swift, TypeScript, PHP, C/C++, HTML5, CSS3, Shell Scripting (Bash)

Frameworks & Libraries: Next.js, React Native, Ruby on Rails, Laravel, WordPress, Redux Toolkit, Storybook, UIKit, Backbone.js, jQuery, JSX

AI & Developer Tooling: Prompt & Context Engineering, Model Context Protocol (MCP), Cursor, Cursor Skills & Rules, Figma MCP, OpenAPI (Swagger)

Cloud, Infrastructure & DB: AWS (EC2, S3, IAM, Route 53, RDS), Docker, Podman, Kubernetes, PostgreSQL, MySQL

Monitoring & Performance: Datadog, Google PageSpeed Insights, Core Web Vitals (LCP, CLS, FCP, TBT, INP), RSpec, CAT QA Tools, Git/GitHub/GitLab

PROFESSIONAL EXPERIENCE

IBJ Inc. (株式会社IBJ) | Tokyo, Japan — System Engineer / Full Stack Developer

Design System Division | Listed Corporate Headquarters (~1,908 Employees) | Oct 2019 – Present

AI-Driven Development, Corporate Migration & System Modernization (April 2025 – Present)

Environment & Stack: Docker, Next.js, WordPress, Cursor, MCP, Figma MCP, Cursor Skills & Rules | Team Size: 4 Members (Japanese Environment)

- **AI Engineering & Standardization:** Pioneered AI-driven development workflows utilizing Prompt/Context Engineering, Model Context Protocol (MCP), and Cursor Skills & Rules across IBJ's franchise opening and corporate web properties.
- **Containerized Infrastructure:** Architected containerized development environments using Docker to enable rapid application deployment, environment consistency, and seamless scalability across dev teams.
- **CMS to Frontend Migration:** Led the architectural migration of high-traffic corporate web portals from legacy WordPress to modern Next.js.
- **Automation & Custom Tooling:** Built customized automated tools including a shareholder benefit store parser (generating clean HTML fragments from shop raw data), a Webpack build-noise reduction Skill (reducing PR cleanup from minutes to seconds), and WebP image optimization scripts.
- **Quality Control Automation:** Established a responsive layout audit Rule to detect visual regressions early and prevent cross-page side effects.
- **Key Achievements:** Reduced manual human review and verification cycles from 7 days to 1 day (85%+ efficiency boost) while significantly improving build stability and page asset load speeds.

In-House Web Performance Optimization & Laravel CRUD Systems (March 2024 – March 2025)

Environment & Stack: WordPress, Laravel, PHP, RESTful API, Google PageSpeed Insights, Datadog | Team Size: 4 Members (Japanese Environment)

- **Core Web Vitals Optimization:** Executed continuous performance tuning and Core Web Vitals optimization over a 1-year period for IBJ corporate portals, systematically targeting LCP, CLS, FCP, TBT, and INP metrics.
- **WordPress System Maintenance:** Maintained and serviced existing WordPress systems (e.g., 'Wedding Navi'), performing media asset purge, database maintenance, and security patches.

- **Laravel Development:** Developed modular CRUD applications using Laravel and PHP to expand backend service capabilities for internal applications.
- **Observability & Monitoring:** Implemented Datadog APM and log monitoring for real-time error tracking, anomaly detection, and operational resilience.

Reservation Dating Web Application ('Oshokuji Date') (March 2023 – February 2024)

Environment & Stack: Next.js, TypeScript, Storybook, Figma, Jira, Atomic Design | Team Size: 5 Members (Japanese Environment)

- **Next.js Frontend Architecture:** Developed the frontend architecture for the 'Oshokuji Date' reservation dating platform using Next.js and TypeScript, handling component architecture through page-level implementation.
- **Isolated Component Development:** Utilized Storybook to build and isolate UI components independently, ensuring high code reusability, strict visual consistency, and rapid testing before production integration.
- **Design System Integration:** Translated complex Figma markup and design specification documents into pixel-perfect, responsive React components following Atomic Design Principles.
- **Agile Workflow:** Managed development sprints, ticket assignment, issue tracking, and cross-team collaboration using Jira.

Marriage Federation Member Platform, iOS Swift App & AWS Cloud Operations (August 2021 – February 2023)

Environment & Stack: Swift, Ruby on Rails, AWS (S3, IAM, EC2, Route 53, RDS), CAT Testing, jQuery, Backbone.js | Team Size: 15 Members (Japanese Environment)

- **Mobile & Web Engineering:** Developed and maintained native iOS mobile features using Swift and UIKit while refactoring legacy Ruby on Rails codebase for the main marriage federation platform.
- **AWS Cloud Infrastructure:** Architected and managed AWS cloud resources, implementing secure file processing via S3, identity and access management via IAM, EC2 instance operations, Route 53 DNS routing, and RDS PostgreSQL management.
- **Quality Assurance & CAT:** Managed QA workflows using Computer-Aided Testing (CAT) tools, establishing comprehensive manual test plans that reduced manual QA effort and shortened release cycles.
- **Legacy System Refactoring:** Refactored legacy Rails frontend components using HTML5, CSS3, JavaScript, jQuery, and Backbone.js, supporting platform growth of up to 66,000 additional users month over month

Marriage Agency Consultation Mobile Application (July 2020 – April 2021)

Environment & Stack: React Native, Redux Toolkit, JSX, OpenAPI (Swagger), Adobe XD, Postman | Team Size: 10 Members (Japanese Environment)

- **Cross-Platform Mobile Dev:** Built a multi-platform mobile application in React Native (iOS & Android) connecting marriage agency consultants with active members (30k+ DAU).
- **State & UI Architecture:** Implemented centralized state management using Redux Toolkit and designed responsive UI logic using JSX.
- **API Contract Standardization:** Defined and managed standardized API specifications using OpenAPI (Swagger) to streamline contract-first development between React Native and Rails backend services.
- **Key Impact:** Successfully ported 80% of core web agency features into the mobile app, driving a 30% increase in consultation requests initiated via mobile.

BridalNet Dating Service & Backend Engineering (October 2019 – June 2020)

Environment & Stack: Ruby on Rails, PostgreSQL, REST API, RSpec, Linux/Windows/macOS | Team Size: 10 Members (Japanese Environment)

- **Full Stack Feature Development:** Engineered key user-facing features including subscription pricing plan pages, content article engines, admin dashboards, and matchmaking dating algorithms.
- **Backend Architecture:** Developed RESTful APIs and managed relational database schemas in PostgreSQL adhering strictly to MVC architecture.
- **Test-Driven Development:** Wrote comprehensive unit tests using RSpec testing framework, maintaining high test coverage and zero-regression deployment pipelines.

EDUCATION & LANGUAGES

Bachelor of Engineering (B.E.) in Computer Science & Engineering

Vishvesvaraya Technological University (VTU) / New Horizon College of Engineering | Graduated: June 2019

Languages & Work Environment:

- English: Fluent / Native Professional Proficiency
- Japanese: Professional Working Proficiency — 6.5+ years of full-time experience in Japanese teams, conducting all daily standups, specification reviews, documentation, and technical execution in Japanese.
